D-MF

High-speed and Precise Thin Wall Injection Molding Solution

Applying to but not limited to below fields:

- Thin wall products
- Hard plastic packing
- Precision electronic components
- Precision Auto Parts
- Optical products
- Medical products

Design Highlights:

- High strength clamping structure.
- Single injection cylinder, compact structure with energy saving and high performance plasticizing system
- Special screw with high plasticizing capacity
- Special heating and temperature control system
- High-speed and intelligent control system
- High precision, high response and high-power full closed-loop hydraulic servo system.
- High repeating accuracy of mold open and close, injection position and the weight of products.
- Modular combination of clamping and injection unit, according to injection pressure, speed requirements and the weight of products

Professional:

12 years experience in manufacturing single cylinder for injection

The third generation of single injection unit technology

Injection unit

- Single injection cylinder, compact structure with energy saving and high performance plasticizing system
- Specialized high plasticizing unit
- Professional heating for plasticization
- Linear guide
- High rigidity integrated injection unit base

- Solid and steady machine body
- Tempering processed heavy machine frame, removing deformation and welding stress, insuring machine precision and life

- Touch screen KEBA controller, precision of the injection time reaches to 0.001S
- Convenient air blow control settings
- Easier operation

Clamping unit

Diagonal double toggle in-roll clamping structure
High rigidity strengthened platen
Excellent alloy steel tie bar
Auto fixed-quantity lubrication system
Big tie bar distance and clamping stroke design
Center ejector pin quick link for option

Electric control

Modular high efficiency power device
Module for hydraulic close to execute component
Specialized high response controller
Precise transducer detection control
Full closed electrical cabinet

TEDERIC provides you with:

Automatic production solution including Injection Molding Machine, Mold, Robot, Centralized Feeding, Automatically taking and stacking, Conveying, detection, Packaging and so on

Mold

Centralized Package

Centralized Feeding

Air compressor

Chiller

Cavities	Wall thickness	Recommended Machine Type
450-500ml takeaway food container		
2	0.33mm-0.38mm	D200/M640F
4	0.37mm-0.45mm	D270/M640F
750-1000ml takeaway food container		
2	0.33mm-0.38mm	D270/M640F
4	0.37mm-0.45mm	D380/M1100F
1250-1500ml takeaway food container		
1	0.35mm-0.39mm	D160/M640F
2	0.38mm-0.42mm	D270/M640F
2	0.35mm-0.39mm	D380/M1100F
2000ml takeaway food container		
1	0.39mm-0.45mm	D200/M640F
Lid (Square Lid, Round Lid)		
2	0.32mm-0.38mm	D160/M640F
4	0.32mm-0.38mm	D270/M640F
Sealed Cans		
2	0.38mm-0.45mm	D200/M640F
4	0.38mm-0.46mm	D380/M1100F

Thin wall products injection molding solution

Customer's practical case
1000 ml takeaway food container
Machine Type: D380/M1100F
Plastic Material: Food Grade PP
Weight: 16.7 g
Cavities: 4

1000 ml takeaway food container lid
Machine Type: D270/M640F
Plastic Material: Food Grade PP
Weight: 7.2 g
Cavities: 4

Electronic components injection molding solution

> > To Create The Maximum Value For users

Service

Tederic Machinery Co.,Ltd.

The most professional Injection Molding Solution Provider!

Tederic possesses 120,000 square meters production bases with annual output of 10,000 sets efficient, precise and energy-saving 55-7000T injection molding machine. It aims to create maximum value for users with its most professional solution.

Over the past years, Tederic had a good reputation in more than 90 countries in the world for its multiple product lines, fruitful functional machine types, excellent product quality and 24*7 services.

With continual R&D and improvement, Tederic currently has 3 categories of “**Dream Series**” products DT\DH\DE, covering the Auto Parts, Logistics, Pipe Fittings, Packages, Home Appliances and Electrics areas. Particularly, in the Pipe Fitting and Package areas, Tederic has its remarkable prestige. A fair number of its injection molding machines can meet the production demand of paint buckets, food boxes, bottle preforms and in-mold labeling technology.

- © **Online services:** e-service system and wechat connecting, allows you to enjoy anytime, anywhere within reach of the online services, identified by specially made for the machine, through the mobile phone will your service needs to convey to the TEDERIC service center, service specialist will be time for you provide answers, and in the app at any time to check your service progress.
- © **Accessories Online:** convenient online mall network service, preferential price online, let your one-stop buy TEDERIC genuine original accessories
- © **Experienced service team:** TEDERIC service team has more than 90 countries or regions of the world's customers for the first time to install or follow up the commissioning of the service.
- © **Sales and service center:** the company headquarters (Hangzhou) as the core, has set up a South China, North China, central China and West China and East China Shanghai and Zhejiang in East China six regional marketing service center; regional customer training and the promotion of products exhibition center set up, equipped with the office and limousine service. The service site to your doorstep. And in more than 20 countries and regions worldwide equipment warehouse, allows you to experience the true meaning of the global service.
